Unicorn configurator.

1. Introduction

This application, will allow you to configure the unicorn of your dreams, and to free it in the rainbow pastures with just a few click!

2. User interface and design

At the center of the screen there are two slides, with arrows at their sides that will allow you to select your favorite unicorn head and body.
Beneath these slides, there will be a button "Free in the pastures!", that will load your unicorn in a page representing the rainbow pastures.

3. User experience.

From the homepage, the user will be able to launch the configurator through a button.
This will load the configuration page where he/she will be able to start configuring his/her unicorn through the arrow icons.
When satisfied he/she will be able do free the newborn Unicorn to the pastures and enjoy an image of it in the wild, in the next screen!
